**Notice of Issuance of a Limited Environmental Review to All Interested Citizens,
Organizations, and Government Agencies**

**Village of Crestline
Sewer Separation Improvements Phase I
Water Pollution Control Loan Fund
CS390289-0002**

The purpose of this notice is to advise the public that Ohio EPA has reviewed the referenced project and finds neither an Environmental Assessment (EA) nor a Supplemental Study (SS) is required to implement the project as discussed in the attached Limited Environmental Review (LER).

The Water Pollution Control Loan Fund program requires the inclusion of environmental factors in the decision-making process for project approval. Ohio EPA has done this by incorporating a detailed analysis of the environmental effects of the proposed action in its review and approval process. Environmental information was developed as part of the facilities plan, as well as through the facilities plan review process. A subsequent review by this Agency has found that the proposed action does not require the preparation of either an EA or an SS.

Our environmental review concluded that because the proposed project is limited in scope and meets all applicable criteria, a Limited Environmental Review is warranted. Specifically, the purpose of this Water Pollution Control Loan Fund (WPCLF) project is to address sanitary sewer overflows within the Village of Crestline's sanitary sewer system as well as assist in achieving compliance with the effluent limits of the Village's National Pollutant Discharge Elimination System (NPDES) permit. Planned upgrades include sanitary sewer line repair via the use of cured-in-place sewer liner, the installation of a back-up power generator, the replacement of degraded manholes, and the installation of approximately 1,700 feet of new sanitary sewer line.

The proposed project:

- has no significant environmental effect;
- does not require extensive specific impact mitigation;
- has no effect on high value environmental resources;
- is cost effective;
- is not a controversial action;
- does not create a new, or relocate an existing discharge to surface or ground waters;
- will not result in substantial increases in the volume of discharge or the loading of pollutants from an existing source or from new facilities to receiving waters; and
- will not provide capacity to serve a population substantially greater than the existing population.

The LER presents additional information on the proposed project, costs, and basis for our decision. Further information can be obtained by calling or writing the contact person named at the end of the LER.

Upon issuance of this determination, the award of WPCLF funds may proceed without being subject to further environmental review or public comment, unless information is provided which determines that environmental conditions on the proposed project have changed significantly.

Sincerely,

A handwritten signature in blue ink, appearing to read "for Gregory H. Smith".

Gregory H. Smith, Chief
Division of Environmental and Financial Assistance
